Why AI & Why Now?

AI is as transformative as the internet or steam engine.

GenAI is already impacting **30%+** of work for many roles.

92% of companies plan to increase investment.

Why AI & Why Now?

When to use which and when to combine them.

Automation

Rule-based, predictable, repetitive tasks

AI

Adaptive, complex, decision-making, unstructured data

Where to Start: Use Cases for AI and Automation

Automation

- IVR routing
- Call list management
- Status updates

AI

- Predictive analytics
- Customer sentiment
- Personalised recommendations

Combined

- Call summarisation
- Adding notes to CRM

From Pilot to Scale

Define value-generating use cases

Identify opportunities where AI can create measurable business impact

Start small, measure, and iterate

Begin with focused pilots that can demonstrate quick wins

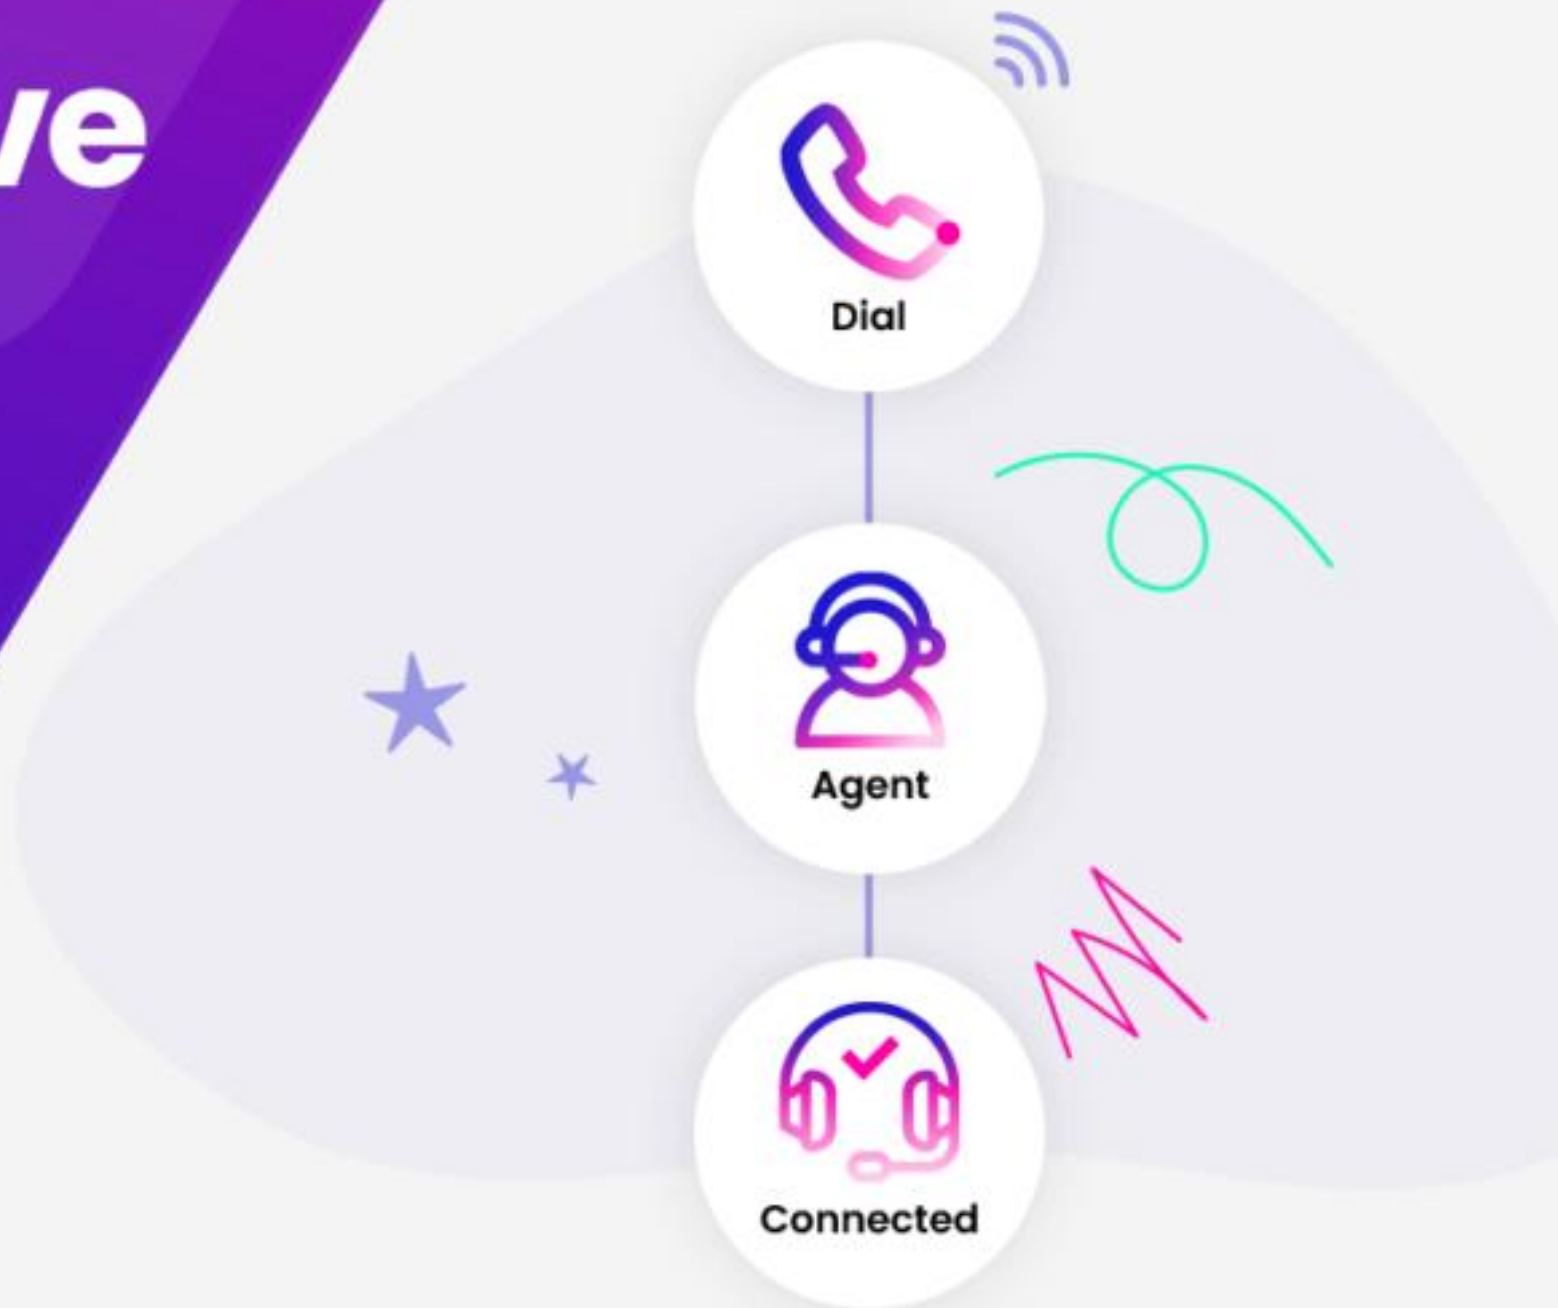

Build trust: AI safety, transparency, explainability

Ensure stakeholders understand and trust the AI systems

Invest in long-term transformation

Create sustainable infrastructure for ongoing AI innovation

Disputes amount ↑ +12 successes vs prior period	Cost	717 +17 ↑	+100 -1000	57% -19 ↓	43% +19 ↑	7 +5 ↑	62% +14 ↑

Key Takeaways

1. **Understand the difference:** Use automation for predictable tasks and AI for complex decision-making.
2. **Start smart:** Focus AI and automation where they deliver the quickest wins — like call handling, follow-ups, and coaching.
3. **Think big, start small:** Scaling AI and automation needs clear goals, trusted systems, and strong leadership commitment.

MaxContact

MaxContact is the best cloud contact centre platform for delivering conversation outcomes and customer insights to generate more revenue – compliantly.
